

CONSERVE WATER NOW

Trility and NPARC urgently request all residents in the NPA to **conserve water immediately**. Our current high water usage is greater than the water treatment plants capacity. If our water usage remains at these high levels, we will run out of water!

How you can conserve water:

- Turn off all taps and hoses
- Report leaking taps, showers and toilets on the Blue Phone or to NPARC
- Report water main leaks immediately
- Don't use hoses to wash cars or boats
- Don't water your garden
- Don't use a sprinkler
- Don't fill up pools

Trility and NPARC thank you for your support and understanding. For further information: www.nparc.qld.gov.au
