

With respect and pride we build a future for our children based on unity, equitable self-governance, education and culture.

Welcome

Where has the time gone? We are nearly at the half way point of 2018. This month our NPARC Departments have been very busy with operations and works within the NPA Region from cleaning the communities for the Tourists Season to planning the annual events.

We welcome the tourist that have travelled to the Northern Peninsula Area (NPA). We hope you enjoy your stay and get to experience all the beautiful sceneries, historic sites and learn a bit of culture.

We ask that all tourists please treat our Region with respect and remember that as you explore, you are visitors upon traditionally owned land. Please be respectful when entering community, the bush or campsites. Rubbish bins are provided at most popular camping sites, and if not, please take your rubbish with you. Please take only photos and leave only footprints.

In other exciting news, the long awaited Cultural Festival is less than four weeks away. There is excitement around the community and this is an event that is not to be missed. For the first time the Cultural Fire Stik (Stick) will travel to the Cape and Torres Strait communities as a way to promote and draw festival patrons. You can track the progress of the Cultural Fire Stick Relay via the festival Facebook page www.facebook.com/NPACulturalFest/

As we look forward to the month ahead, I hope that these newsletters are providing you with updated information across NPARC. If you would like to share or know more about advertising with NPARC please contact media@nparc.qld.gov.au or contact (07) 4048 6600.

Monthly Star sign Horoscopes

Star Signs

Aries - March 21 - April 19

Money and income opportunities are coming your way during the May 15 new moon. Figure out easier ways to do what you already do. People may want you to do it for them, too, and they're ready to be generous. On the twenty-third, the sun-Mars trine gives you more energy than most. Interact with a lot of people and maybe get involved in some new projects. For the full moon on May 29, try something new or go someplace adventurous. You might end up binge-watching travelogues, but chances are good that you'll want to go out and sample the culture.

Taurus April 20 - May 20

Have a breakthrough on the May 15 new moon. Appreciate what is working right, and see who really is on your side. You might be surprised by how many people have your back. Also, Uranus enters Taurus that same day. You now have the gift of surprise that you can use to further your aims. The May 29 full moon lets you win the respect of someone who used to doubt you. You have insights now and can find solutions and options that are overlooked by people who consider themselves smart. There's no need to brag or show off. Just be you.

Gemini May 21 - June 20

Think long and deeply under the May 15 new moon. Have an insight that gives you a firmer foundation and greater happiness and self-confidence when you decide to more fully engage with the world. The sun enters Gemini on the twentieth. Entertain and be entertained, although you might attract more attention than you intended. Love and romance are golden under the full moon of May 29. Hear your partner express your fondest desires. If looking for love, you could attract the attention of someone just right. It might not last forever, but it could last plenty long enough. Mercury enters Gemini today, too. Clever you!

Cancer June 21 - July 22

Party on during the new moon on May 15. Be safe and sensible and still have a great time with the crowd. Time may be short, and you may not get to do everything, but you can try. Venus enters Cancer on the nineteenth. Be prepared for a burst of popularity. People will find you more attractive no matter how you feel. Around the May 29 full moon, spending time with others could turn out to be the best way to take care of yourself. Be self-reflective, but don't drop out of sight and isolate yourself. It's okay to not be hyperactive.

Leo July 23 - August 22

Career and social standing are spotlighted during the May 15 new moon. Create an avenue for advancement that benefits everyone, including you. You have great family support even if it's unspoken. The sun enters Gemini on the twentieth. Indulge your inner child and curiosity a bit more. On the May 29 full moon, be willing to take a playful but calculated risk. You can learn a lot now no matter how things turn out. So long as you follow your passion and aren't reckless about safety or money, you should be fine. It could be quite a thrill, too.

Virgo August 23 - September 22

Mercury enters Taurus on May 13. Become more grounded and spend more time on practical, pleasant issues. Home and work life should get smoother. The world just gets more and more beautiful under the new moon on the fifteenth. No matter what is happening around you, you won't overlook or underestimate everything that's going right. The full moon on May 29 shines into your family and home environment. Be welcoming and let someone suggest improvement or a way to expand a domestic interest. Try cooking a new cuisine or maybe add a new variety of vegetable or flower to your garden.

Aries Taurus Gemini Cancer

Leo Virgo Libra Scorpio

Sagittarius Capricorn Aquarius Pisces

Star Signs

Libra September 23 - October 22

Be smart about something fundamental or financial at the new moon on May 15. Without intending it or making elaborate plans, you stand to gain greatly in some material way. Venus opposes Saturn while the moon is in Libra on the twenty-fifth. Reconcile with an older friend or family member and maybe gain a new mentor. For the full moon on May 29, let your curiosity be your guide. Let your inner child come a little closer to the surface and be more amused by the world. It's okay if you aren't focused or passionate about any one thing for very long.

Scorpio October 23 - November 21

The sun-Pluto trine on May 11 energizes you and gives you opportunities to network and socialize in a loftier circle. Some people may be hesitant or tired, but not you. Be charming and smart about love with the new moon on the fifteenth. A special someone could think that you're the answer to all their prayers - or problems. You'll know who (and which) it is. The May 29 full moon is for fixing a money matter or revamping something that used to be a money-maker. Feel lucky and be smart. You can improve your cash flow and be more in the black now.

Sagittarius November 22 - December 21

The sun-Jupiter opposition is on May 8, when Jupiter is at its brightest. Be at your wisest and most discriminating when choosing when and how to be generous. With the new moon on the fifteenth, find that little trick that lets you train the dog, bring the houseplants back into bloom, or eliminate some small physical annoyance. The effort will be minor, but the results will look like magic. Get in the mood to concentrate on yourself during the full moon on May 29. If you get bored or the outside world distracts you, a good friend or partner will bring you back. Be grateful.

Capricorn December 22 - January 19

Do what pleases you most during the new moon on May 15. There may be plenty of suggestions and opinions, but now is the time to do what makes you happy. Mercury trines Saturn on the eighteenth, bringing up an unresolved issue whose time has come. You can easily solve it now. It's an intense full moon on May 29, but it doesn't have to be stressful or discouraging. Carve out some quality private time and feel good about what you're doing, the sacrifices you're making, and the good causes you're advancing. It's all moving you ahead and making you better.

Aquarius January 20 - February 18

Solve a domestic problem or revamp your home environment when the moon is new on May 15. Spot what change you want to make, or playfully experiment and see instant improvement. Mars squares Uranus, newly in Taurus, in the sixteenth. Pay attention to finances and avoid any unnecessary complications or confusion. Get out and socialize during the May 29 full moon. No gathering is too large. You may not remember everybody's name, but they will all remember you and want to see you again. You have things to say, and there are a lot of people who want to hear it all.

Pisces February 19 - March 21

Jupiter opposes the sun on May 8, and you may have a few more self-doubts. Just be honest and feel good about how things are going. Enjoy your favourite people and local pleasures during the new moon on the fifteenth. There may be a lot of exotic temptations now, but they will still be there later. The full moon on May 29 lets you focus on career moves or social interactions. It's a complicated time, but you have the instincts and intuition to navigate through it all. Don't over promote yourself, but don't back away from a promising suggestion or offer of advancement or responsibility.

Running for Bums

Jenna Brook has started her journey with "Running for Bums". Jenna is currently over 3000kms into her 4500km run from Tasmania to Cape York all in a bid to raise awareness and funds for Bowel Cancer Australia. Jenna wants to break down the barrier of embarrassment and get people talking about their bums!

As Jenna completes the final 1500kms of her run in Far North Queensland it would be fantastic if communities can get behind her. Whether you are able to organise a community gathering to welcome her as she runs into your town, a chat with school children about her journey and why she is doing it, a wave and toot as you see her running along the road.
